

Tongston's Flipped Parallel Learning Model for K–12 Integration

Unlike traditional flipped classrooms, our model runs in **parallel** with national or international curricula, offering complementary entrepreneurial education without replacing what students already learn.

Key Features

- **Not a Replacement:** Runs alongside national curriculum (British, Nigerian, IB, etc.).
- **Teacher-First Rollout:** Teachers access platform to run project-based entrepreneurial activities with students.
- **Weekly Projects:** All subjects infused with real-world personal, professional & public challenges.

Learning Pathway

1. **Phase 1 – Teacher Access**
 - Teachers access AI-powered planning tools, weekly project guides, and assessments.
 - Projects are co-curricular or extracurricular and follow student group formats.
2. **Phase 2 – Student Access**
 - Students access self-paced platform: entrepreneurship-based modules, challenges, and assessments.
 - Allows personalized, anytime learning alongside classroom instruction.
3. **Phase 3 – Full Transformation**
 - School adopts full flipped model.
 - Curriculum is project-anchored, students lead initiatives, and performance is tracked through dashboards.

Platform Tools

- **AI Assistant** for lesson/assessment planning.
- **10-Part Rubric** for evaluating projects and conduct.
- **Leaderboard & Recognition System** to incentivize excellence.
- **Teacher Development Hub** for lesson feedback, CPD tracking, and peer learning.

This model works in all school types—public, private, low-cost, elite, and inclusive schools.
